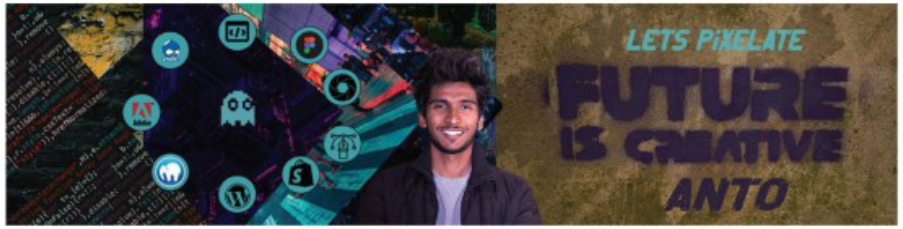
RESUME



ANTONIO DIVINASH FERNANDO
Ottawa, Ontario | Open to Remote Opportunities
divinashfdo@hotmail.com | +1 (416) 828-1605

PROFILE

Creative and detail-oriented Interactive Media Design student at Algonquin College with professional experience in UX/UI design and digital product development. Skilled in crafting user-centered digital experiences through research, prototyping, and interface innovation. Experienced working remotely with international teams and collaborating across disciplines to deliver impactful, brand-consistent solutions. Passionate about merging design thinking with technology to create intuitive and engaging digital products.

CORE COMPETENCIES

UX/UI Design & Prototyping
Wireframing, user flows, interactive prototypes, mobile & web interface design
User Research & Usability Testing
User journey mapping, feedback analysis, accessibility improvements
Design Tools
Figma, Adobe XD, Photoshop, Illustrator, Creative Suite
Collaboration & Communication
Cross-functional teamwork, stakeholder engagement, remote collaboration
Leadership & Project Coordination
Team supervision, workflow optimization, deadline management

EDUCATION

Interactive Media Design (Undergraduate Program)
Algonquin College – Ottawa, ON
Expected Graduation: 2026
Diploma in Technology
American Institute of Computer Technology – Sri Lanka
Graduated: 2021

PROFESSIONAL EXPERIENCE

Junior UX/UI Designer (Co-op)
ADC Technologies – Qatar (Remote)
June 2025 – December 2025

- Designed wireframes, user flows, and high-fidelity prototypes for web and mobile platforms.
- Collaborated with developers and project managers to ensure seamless implementation of design solutions.
- Conducted usability testing sessions and applied user feedback to improve accessibility and engagement.
- Maintained consistent brand identity across digital touchpoints.
- Contributed innovative UI improvements that enhanced overall user interaction and satisfaction.

Team Leader
Evolve Technologies – Sri Lanka
2020 – 2022

- Led a team of seven professionals delivering IT support and technical solutions.
- Improved operational efficiency by streamlining system implementation and troubleshooting processes.
- Coordinated project timelines to ensure timely service delivery.
- Mentored team members and conducted performance reviews to drive professional growth.

Client Account Executive
Eaglesberg – Sri Lanka
2018 – 2020

- Conducted SEO audits and provided strategic, data-driven recommendations to improve digital performance.
- Managed client communications and maintained strong professional relationships.
- Identified business growth opportunities and contributed to proposal development initiatives.

TECHNICAL SKILLS

- UX Research & Interface Design
- Prototyping & Wireframing
- Adobe Creative Suite
- Figma & Design Systems
- SEO Fundamentals
- Microsoft Office & Collaboration Tools

VOLUNTEER EXPERIENCE

Class Representative
Algonquin College – Ottawa, ON (2024–2025)

- Acted as liaison between students and faculty during first two semesters.
- Communicated feedback and supported academic coordination.

Secretary, Technology Club
St. Benedict's College

- Managed records, scheduled meetings, and supported club communications.

PROJECT OVERVIEW POKIE

Interactive gaming platform with modern UI/UX design, responsive layout, and smooth animations built with HTML, CSS, and JavaScript.

https://antoniofdo.github.io/pokie/

Overview

This project was created as a front-end website inspired by gaming culture and the Pokémon universe. The goal was to design a platform that feels playful and interactive while still maintaining clear structure and usability. The site includes a homepage, themed sections, and a Pokédex area that helps users explore content in a more engaging way. The live site includes navigation for **Home, Pokie, and Bag**, a Pokémon-branded hero area, multiple content cards, and a Pokédex section.

Problem

Many fan-based or gaming-themed websites become visually crowded and difficult to navigate. The challenge for this project was to create a platform that captures the excitement of a gaming brand while keeping the interface clean, readable, and easy to use across devices.

Goal

- The main goal was to build a responsive and interactive web experience that:
- reflects a gaming-inspired visual style
- provides a simple and engaging navigation flow
- uses animation and layout to make the experience more dynamic
- showcases front-end development skills using HTML, CSS, and JavaScript

Target Audience

The target audience for this project includes:

- Pokémon fans
- casual users who enjoy gaming-themed websites
- users looking for a visually engaging browsing experience
- recruiters or instructors reviewing front-end UI work

Design Approach

The interface was designed with a bold and recognizable visual identity. Pokémon-themed imagery, section-based layout, and large visual elements were used to create immediate interest. The design balances playful branding with a structured content flow so users can explore the site without confusion. The homepage uses prominent images, short text blocks, and repeatable “Read More” actions to keep content easy to scan.

UX Decisions

Key UX decisions in this project include:

- **Simple top navigation** for quick movement between sections
- **Clear visual hierarchy** with images, headings, and short text blocks
- **Card-like content sections** that break information into digestible parts
- **Responsive structure** to support desktop and mobile viewing
- **Interactive feel** through animation and themed presentation

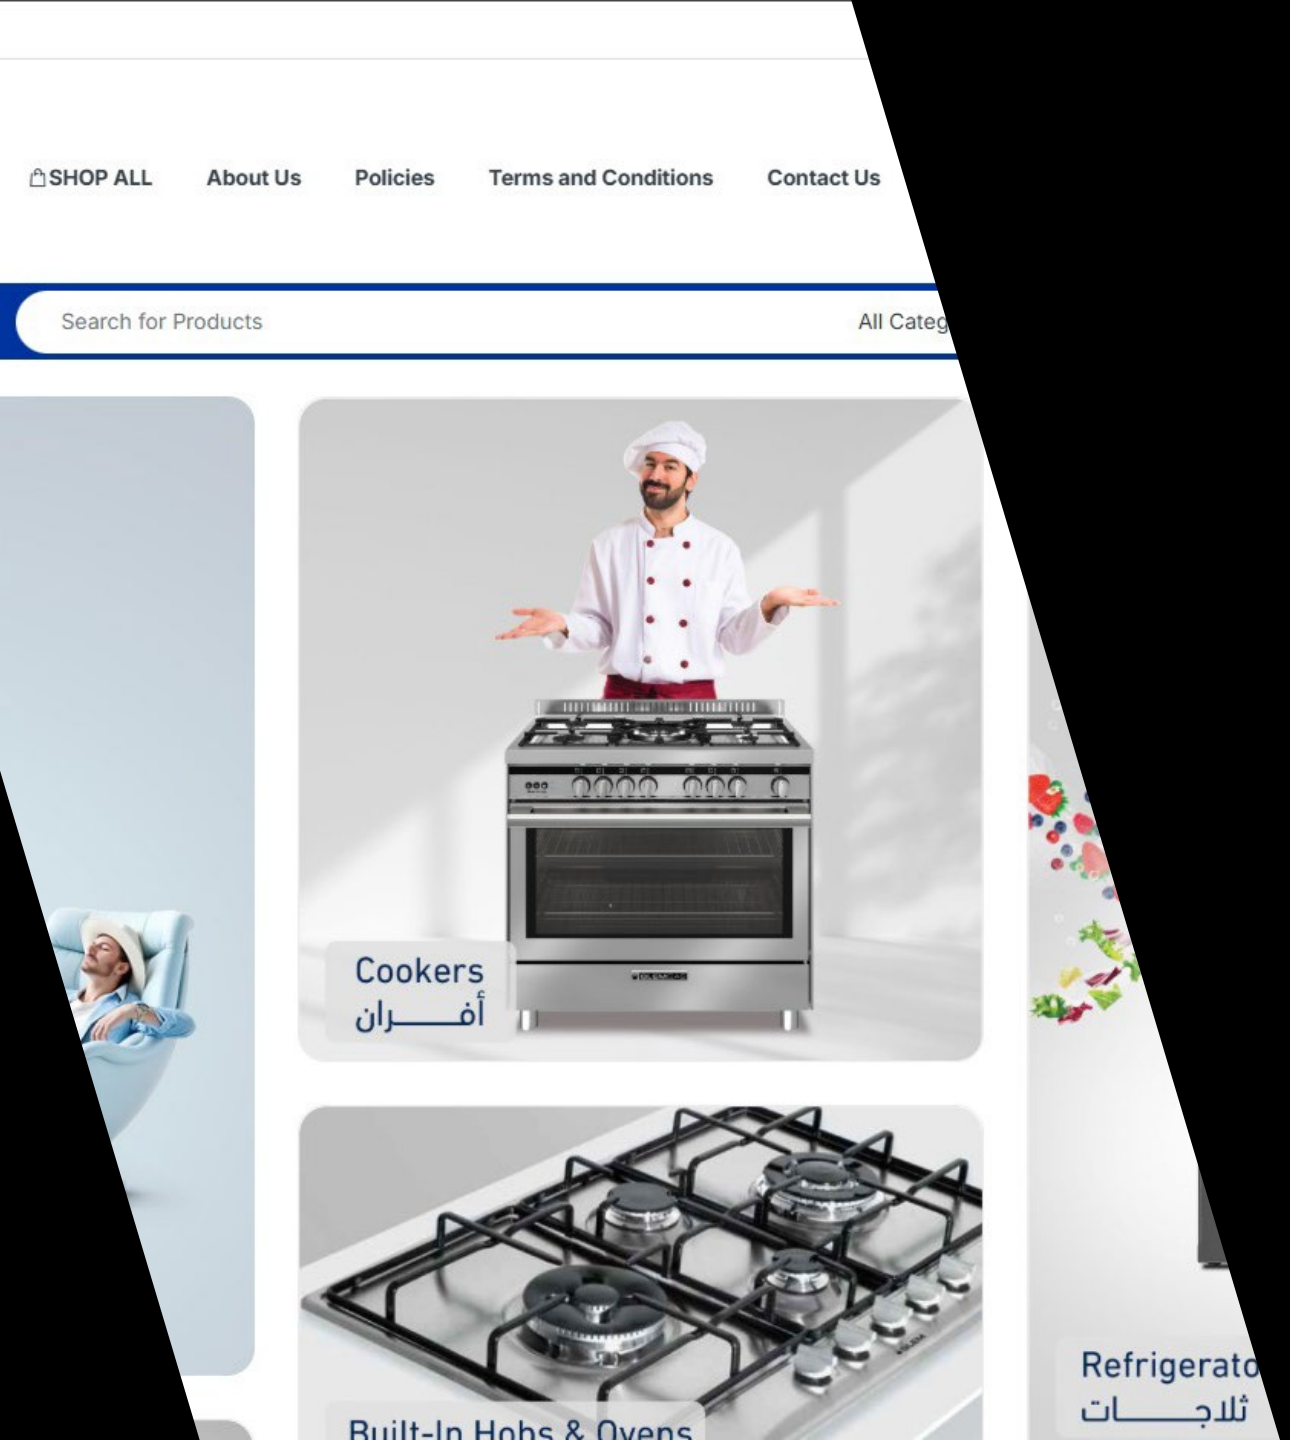
Features

Some of the main features of the project are:

- gaming-inspired landing page
- responsive navigation menu
- visually rich content sections
- Pokémon-themed branding and imagery
- Pokédex section for themed interaction
- smooth transitions and engaging UI presentation

Tools Used

- **HTML** for content structure
- **CSS** for styling, layout, responsiveness, and visual effects
- **JavaScript** for interactive elements and user engagement
- **Interactive feel** through animation and themed presentation



PROJECT OVERVIEW

GENERALCO.QA

Designed a responsive e-commerce frontend for an appliance store, featuring clean UI, structured navigation, and user-friendly product browsing experience.

https://generalco.qa/

- **Overview**
- Designed and developed the frontend of an e-commerce platform for home appliances, focusing on usability, clean layout, and structured product browsing. The website allows users to explore multiple product categories with ease while maintaining a consistent and responsive design across devices.
-

- **Problem**
- Many e-commerce websites for appliances tend to be cluttered, making it difficult for users to quickly find products or navigate between categories. The challenge was to simplify the browsing experience while still presenting a wide range of products clearly.
-

- **Goal**
- Create a clean and modern interface
- Improve product discoverability
- Ensure smooth and intuitive navigation
- Build a fully responsive layout for all devices
- Provide a user-friendly shopping experience

- **Target Audience**
- Homeowners looking for appliances
- Individuals upgrading or replacing household products
- Users who prefer quick and easy product browsing
- General online shoppers
-

- **Design Approach**
- The design follows a minimal and structured layout to reduce visual clutter. Product categories are clearly separated, and visual hierarchy is used to guide users through the content. The interface focuses on readability, spacing, and consistent styling to create a professional look.
-

- **UX Decisions**
- Simple and clear navigation menu for easy access to categories
- Grid-based product layout for better scanning
- Consistent spacing and alignment for readability
- Responsive design for mobile, tablet, and desktop
- Clear call-to-action elements to guide users

- **Features**
- Category-based product browsing
- Responsive layout across devices
- Clean product listing pages
- Structured navigation system
- Modern UI with consistent design elements
-

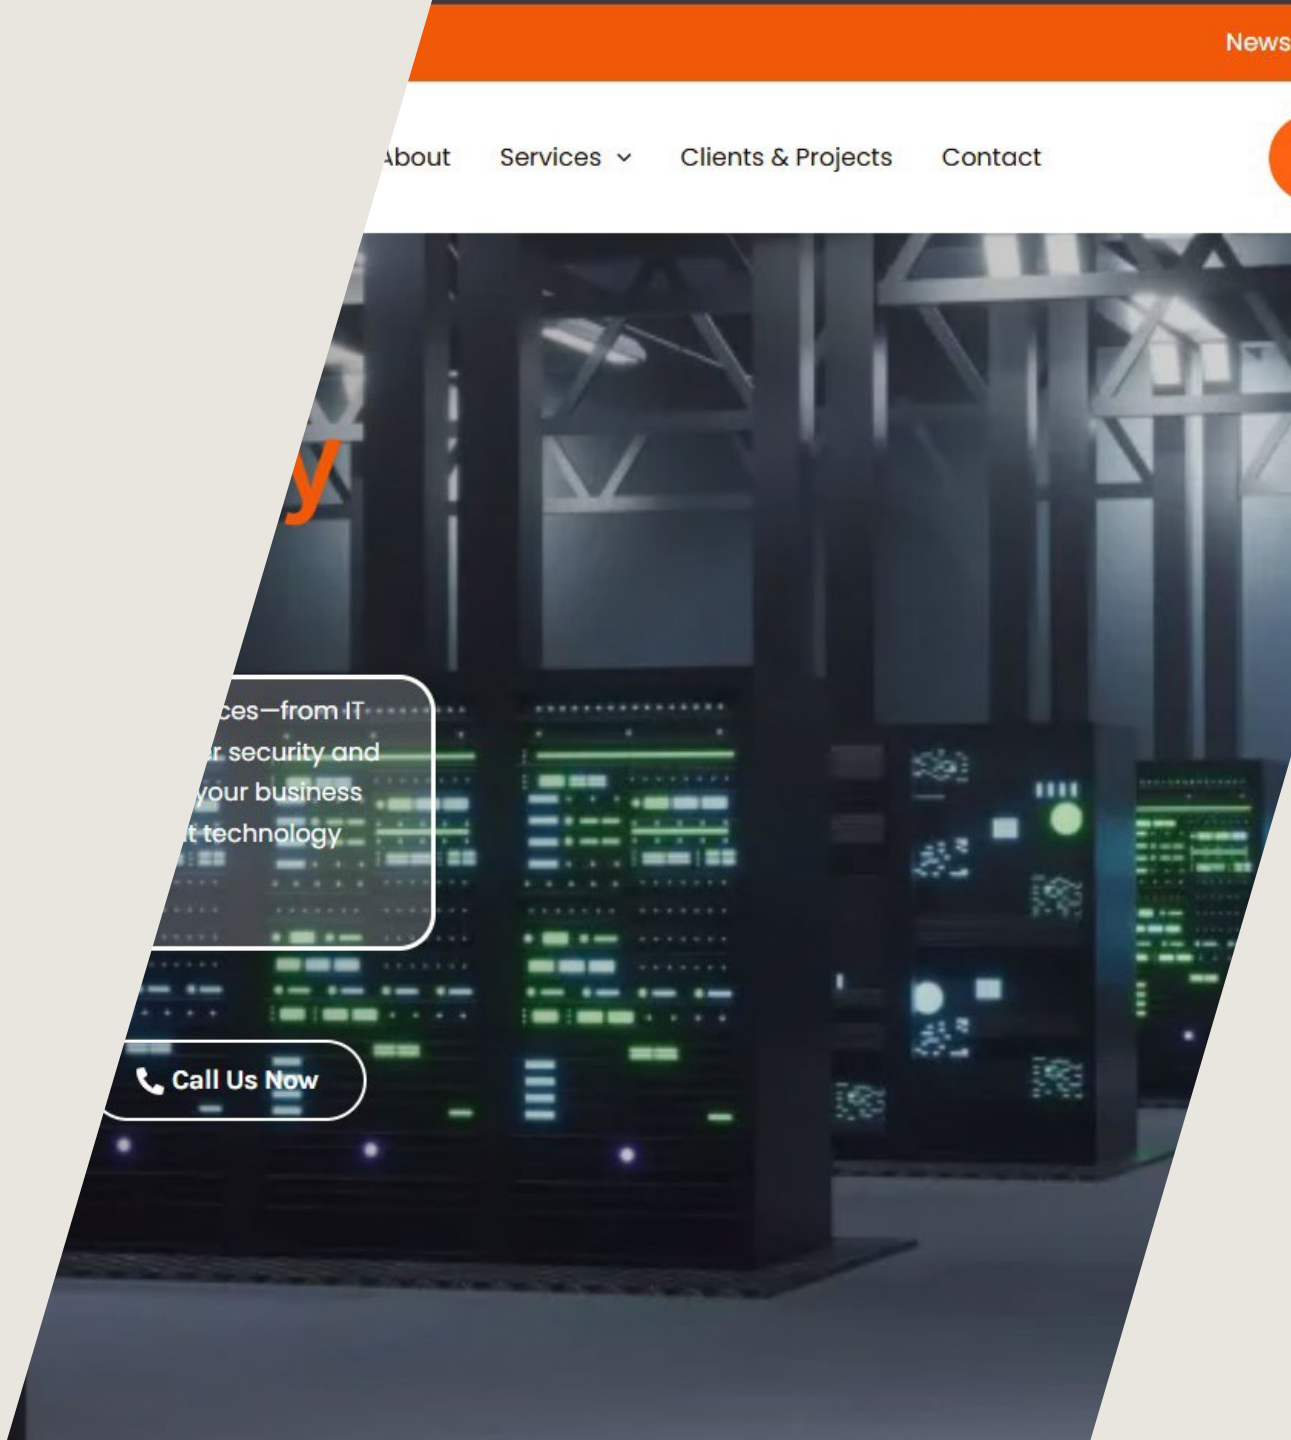
- **Tools Used**
- **HTML** – structure
- **CSS** – styling and layout
- **JavaScript** – interactivity

PROJECT OVERVIEW

CONNECTION MIDDLE EAST

Designed a responsive e-commerce frontend for an appliance store, featuring clean UI, structured navigation, and user-friendly product browsing experience.

https://cme.com.qa/



Overview

Developed the frontend of a corporate e-commerce website for home appliances, focusing on creating a clean, responsive, and user-friendly interface. The platform enables users to browse products across multiple categories with a smooth and consistent experience on all devices.

Problem

Appliance e-commerce platforms often present too much information at once, leading to cluttered layouts and poor navigation. This makes it difficult for users to quickly locate products or understand category structures.

Goal

- Design a modern and visually clean interface
- Enhance product visibility and browsing experience
- Simplify navigation across categories
- Ensure full responsiveness across devices
- Deliver a seamless and intuitive user journey

Target Audience

- Homeowners searching for appliances
- Customers upgrading household equipment
- Users looking for quick and simple browsing
- General online shoppers

Design Approach

A minimal and grid-based layout was used to organize content effectively and reduce visual overload. Clear sectioning and consistent styling help guide users naturally through the website while maintaining a professional and modern look.

UX Decisions

- Implemented straightforward navigation for easy access
- Used grid layouts to improve product scanning
- Maintained consistent spacing for better readability
- Designed for responsiveness across all screen sizes
- Added clear CTAs to support user actions

Features

- Multi-service structured layout
- Responsive design across devices
- Clear navigation system
- Service-focused content sections
- Professional and modern UI

Tools Used

- **HTML** – structure
- **CSS** – styling and layout
- **JavaScript** – interactivity
